

Inventory Optimisation Bureau Service

Get a proven 'all star' planning team without the 'all star' price tag

The Challenge

It is difficult and costly to find, acquire and maintain the right resources (ie knowledge, tools, practices) required to consistently deliver the desired levels of inventory performance.

The Solution

The Inventory Optimisation Bureau Service is a complete, packaged solution that provides:

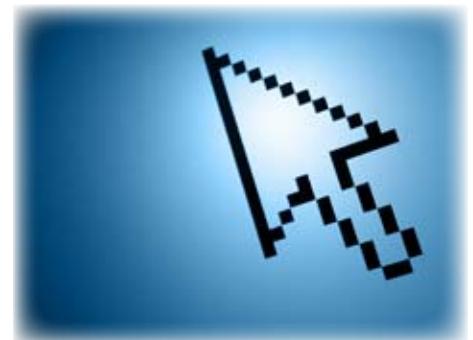

- proven supply chain experts with the right knowledge and practical, hands-on experience,
- information from our proven "best-of-breed" planning and optimisation tools,
- best practice methodologies and processes, and
- guaranteed, consistent results.

With the Inventory Optimisation Bureau Service, our proven resources become part of your planning team, and we work with you on an on-going basis to deliver desired business outcomes. Think of it as a powerful engine, an experienced support team and a championship driver. We bring all the elements required for a winning formula.

The Benefits

- ✓ improved customer service levels and item availability
- ✓ reduced inventories
- ✓ reduced operating costs and lower overheads
- ✓ reduced workload and effort - focus on exceptions!
- ✓ knowledge transferred to your team
- ✓ added value to your existing resources
- ✓ quick and easy; up and running in four to eight weeks
- ✓ self-funding service with guaranteed results - we are accountable for delivery

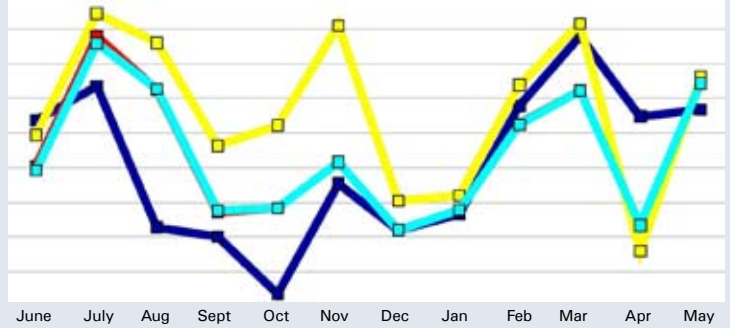

= INCREASED ROI

The Bureau Service provides:

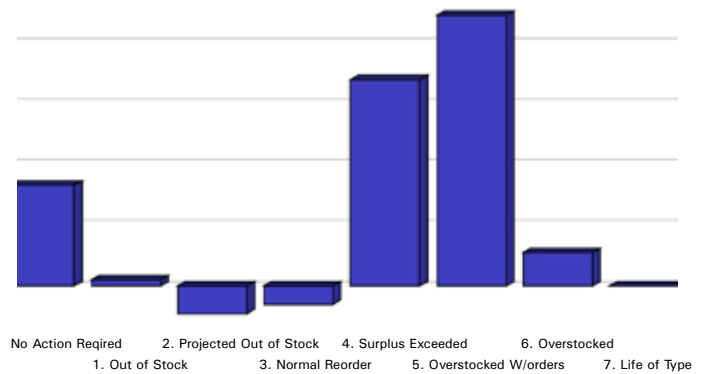

Forecasting & Demand Planning

Creates accurate statistical forecasts based on historical demand and future events.

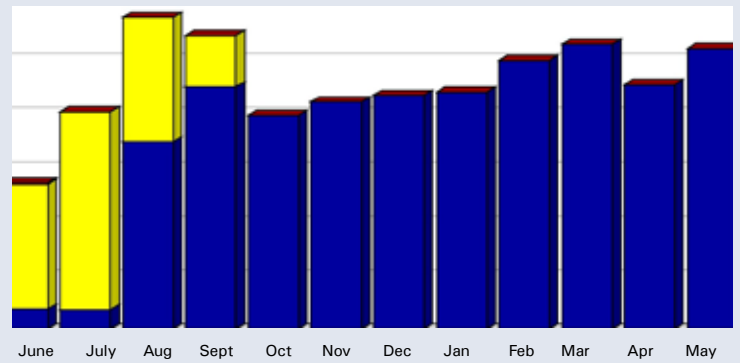

Inventory Optimisation

Determines the least amount of inventory required to meet service level targets at the lowest cost.

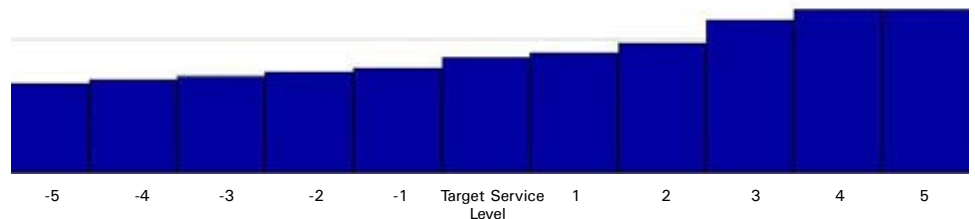

Supply & Capacity Planning

Creates forward purchasing and replenishment plans whilst highlighting capacity requirements across the supply chain network.

Sales & Operations Planning

Highlights business risks and opportunities by exception and enables fact-based trade-off decisions to be made.
